PROFESSIONAL EXPERIENCES

Internship: EHC Group

May 2025 - September 2025

- Participation in the design and development of an internal recruitment platform "The Recruiter", from needs analysis to the creation of a functional application.
- React, TypeScript, Tailwind, Java Spring Boot, Spring Security (JWT) and MySQL.

COMPLETED PROJECTS

SmartShop : REST API for commercial management (Spring Boot)

- REST API for B2B commercial management integrating customer management, orders, multi-method split payments and a split loyalty system with scalable discounts, ensuring complete financial traceability.

Tricol: Stock and Order Tracking Platform (Spring Boot).

- REST API for managing supplier orders and stock with FIFO method, including product management, issue notes, batch traceability and stock alerts.

JobFinder: job opportunities search platform (Angular)

- A job search application built with Angular that helps users discover job opportunities from an external jobs API. The application provides a seamless experience for searching, filtering, saving favorites, and managing job applications.
